REMOTE-WORK CYBER RISK MANAGEMENT

Business continuity in times of disruption

3 out of 4 cyber attacks are aimed at individuals working remotely.

With the increased need for people to work remotely, we are seeing rising levels of targeted cyber attacks. Hackers are indiscriminately aiming for organisations of all sizes. Those with 5-500 employees are especially at risk. The resulting impact could be crippling for most businesses. Loss of financial assets and data, large penalties, business downtime, and damaged relationships with customers are becoming the norm.

As the lock-down in the UK continues and organisations follow governmental guidelines, advising their employees to work from home, the situation is getting worse with hackers constantly developing new ways to breach corporate data and IT systems.

Top 5 Risks/Opportunities

RISKS		OPPORTUNITIES
1 DATA THEFT		IMPROVED SECURITY 1
2 EXTORTION AND RANSOMWARE		COST-EFFECTIVE BYOD POLICY 2
3 OPERATIONAL DOWNTIME		COST-EFFECTIVE REMOTE-WORK POLICY 3
4 SOCIAL ENGINEERING		IT BUSINESS CONTINUITY PLAN 4
5 INSIDER THREATS		TRAINING & AWARENESS 5

How do we solve it

We have a simple and effective solution for helping clients tackle the cyber security threats emerging from large-scale remote-work and BYOD. Our Risk Management Services can typically help most organisations mitigate the majority of their new cyber security and compliance risks without impacting business performance.

Which organisations would benefit the most?

Whether you are an SME, that relies heavily on centralised business and IT infrastructures, or a large corporate with a complex global footprint, we can help you fully uncover the risks and opportunities from employees working from home. Our mature Remote-Work Cyber Risk Management service could protect you from the most important business-critical threats in the digital landscape.
